Hello everyone, welcome to our tour today. My name is Lisa and I'll be your guide. We

are going to visit the famous Great Wall of China. The Great Wall is an ancient defense project built more than 2,000 years ago to protect China from invaders. It is the longest wall in the world, stretching over 13,000 miles.

As we walk along the wall, you'll see the unique design and layout of the watchtowers, which were used for surveillance and signaling during wartime. The bricks used to build the wall were made from local materials, such as clay and straw, and it took over a million laborers to complete the construction.

I hope you enjoy your visit to the Great Wall and learn more about the history and culture of China. If you have any questions, please feel free to ask me.
