四级翻译题目:

长江全长6000多米,是中国以及亚洲最长的河流。它发源于青藏高原,流经11个省,往东注入东海。长江流域居住着约4亿人,其中少数民族人口约占6%。从唐朝以来,长江流域一直是中国的经济中心,同时也是中国现代工业的起源地。但是,目前长江流域的经济发展很不平衡,河流三角洲地区发达,而上游区域相对落后。

参考译文:

The Yangtze River is over 6,000 kilometers long, ranking as the longest river in China and Asia. It originates from the Qinghai-Tibet Plateau, flows through 11 provinces, and empties into the East China Sea. The Yangtze River basin is home to about 400 million people, with ethnic minorities accounting for approximately 6%. Since the Tang

Dynasty, the Yangtze River basin has been the economic center of China, and it is also the birthplace of China 's modern industry. However, the current economic development in the Yangtze River basin is quite uneven, with the river delta region being developed, while the upstream areas are relatively underdeveloped.
